

How To Access The Demo LFM NetView 4 Project

The following information details how to access the demo LFM NetView 4 project; currently hosted on the Microsoft Azure cloud platform.

LFM NetView 4 is supported in both the *Google Chrome* and *Internet Explorer 11* browsers, as well as on multiple desktop, laptop and tablet platforms.

Please use the following instructions to access the demo project; if you have any issues or would like further information on the LFM NetView 4 project, please contact the [LFM Support Team](#).

1. Accessing the demo project landing page

In order to login to the demo LFM NetView 4 project, you will first need to visit the project landing page which can be accessed by using the link below. This link is the one entered in your browser's URL bar at the top.

<https://nexus1.lfm-software.com/ERDemo/HTML/netview.html>

2. Authenticating your access

If this is your first time accessing the demo LFM NetView 4 project, or you have reset your browser's cache recently, you are required to authenticate your access by providing your login details. Please use the following login credentials:

Username: **guest**

Password: **guest**

3. Logging into your LFM NetView 4 project

Once you have authenticated access to the demo project landing page, you will see a login form with three fields; the project URL field, the username field, and password field.

Enter the following URL in the project URL field:

https://nexus1.lfm-software.com/ERDemo/netviewprojects/Eaton_Revamp/Eaton_Revamp.proj

Next, enter your username and password in the appropriate fields.

Username: **guest**

Password: **guest**

Once you have entered your login details, click the 'Open' button.
